Data Analyst

Overview

The Louisiana Primary Care Association (LPCA) is conducting a job search for a Data Analyst who will be responsible for overall data collection, analysis, and reporting for the LPCA as a network organization, providing technical support and assistance, and engaging health center staff in continuous quality improvement through the use of relevant data reports and comparisons to strengthen patient care.

Established in 1982 as a non-profit organization, the Louisiana Primary Care Association, Inc. promotes accessible, affordable, quality primary healthcare services for the uninsured and medically underserved populations in Louisiana. It is a membership organization of Federally Qualified Health Centers (FQHCs) and supporters committed to the goal of achieving health care access for all. LPCA represents 39 federally funded Community Health Center organizations across Louisiana. These organizations operate over 280 individual sites, and serve over 440,000 patients a year. LPCA serves as the leading statewide advocacy organization in support of community-based health centers and works to stress the importance of healthcare access as the foundation to building healthier communities.

LPCA is an equal opportunity employer, meaning that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, handicap, national origin, sexual orientation, disabled veteran status, or Veteran of the Vietnam Era.

Job Summary

- Manage and coordinate performance data collection, feedback, and reporting for all quality initiatives; Engage members through relevant data reports and comparisons; Provide direct support to health centers in data collection, monitoring the completeness and accuracy of reported data, and ensuring compliance with process and outcome measure definitions.

Responsibilities:

1. Analyzing and leveraging the collected data
2. Interpreting data
3. Acting as a liaison between clinical and informatics staff teams
4. Developing strategies and best practices to incorporate into future information systems and policies.
5. Manage and coordinate performance data collection, feedback, and reporting for all quality initiatives.
6. Engage members through relevant trend information, data reports and comparisons.
7. Provide direct support to health centers in data collection, monitoring the completeness and accuracy of reported data, and ensuring compliance with process and outcome measure definitions.
