Projected Retirement Eligibility and Benefit Estimate YOUR RETIREMENT ELIGIBILITY & ESTIMATES						
The following table shows a projection of your retirement eligibility dates and your maximum TRSL retirement benefit based on various retirement scenarios. The projections are based on current information as reported by your employer(s) and assume continuous TRSL-covered, full-time employment. The final average compensation (FAC) is an average of your current highest five (5) consecutive years of earnings as submitted by your employer. Future salary increases are not included in the FAC used in these projections.						
This estimate is provided to help you make informed decisions about your retirement benefit and is not a guarantee of when you will be eligible or the amount you will receive at the time you retire. The actual pension you receive at retirement and when you will be eligible to retire are determined by state law. When you retire, your pension will be calculated according to the applicable retirement calculation formulas.
