12.5% of deaths statewide

9219 cases
10.3% of cases statewide

● Cases ● Deaths

New cases per day reached a record high at 532 cases on 8/2/20, and continue to rise

Daily case and death increases are sourced from the AL Political Reporter, which tracks daily updates to the ADPH's public-facing dashboard. These are calculated by subtracting the cumulative total of confirmed cases/deaths on the dashboard at 11:59 p.m. from the previous day's cumulative total. ADPH data is provisional and subject to change, which may lead to inconsistencies in daily increases across different data sources. This data is preserved as it was publicly recorded.
