April 11, 2022

To all of my wonderful patients:

After 26 years in private practice I have decided to lend my experience to the next generation of OB Gyns. I will be scaling back my private practice to only Friday afternoons and will be joining the LSU Woman's Hospital OB GYN faculty as a full time faculty Clinical Professor. My Friday afternoon clinics will be geared toward Gyn Robotic Surgery cases which will remain my passion and pursuit.

If you or someone you know is suffering from pelvic pain and/or excessive bleeding I will be happy to help with minimally invasive procedures. I will dearly miss you all and I am forever grateful for the wonderful practice you have afforded me and the privilege of seeing your lives unfold before my eyes. I wish you all the best!

Sincerely,

Edward Schwartzenburg, M.D.
