

MULTI-STATION PRINT

- > Print from any convenient MFP.
- > Change the print settings and print again.
- > Only print what you need, reducing wasted print outs.
- > Secure documents by retrieving the print job at the time that you need it.
- > Reduce server installation and maintenance costs.

The challenge

Confidential documents are being taken from the printer raising concerns about an information breach.

Large print jobs or copy jobs can tie up a printer preventing other workers from completing their jobs.

The solution

Toshiba's Multi-Station Print feature that allows users to retrieve their print jobs from any convenient Toshiba MFP in the office. No special server is required.

This feature allows printing from up to 10 MFPs at different locations even on different floors in the same network.

The print jobs are held by a primary MFP and only printed when the user swipes their ID card or logs in at the MFP.

MULTI-STATION PRINT

Benefits

The Multi-Station Print solution is a server-less printing solution that allows printing from any of up to 10 networked MFPs. There is no need to wait until your designated MFP is ready.

This solution, along with user authentication enables printing from any available printer when you hold your card over the reader. It allows you to change the print settings on the control panel before printing, thus reducing waste. It also provides security by holding print jobs rather than letting them sit in the output bin. Re-printing is available without sending a job again.

No special server is required. Easy set up is ensured since user information and the address book in one MFP can be easily cloned to other ones.

Multiple MFPs can be efficiently shared in the office, to optimize management and operation.

The Multi-Station Print feature is an ideal solution for all departments. Especially, where a lot of users share multiple MFPs.

> Education

- Teachers and Administrators sharing multiple MFPs.

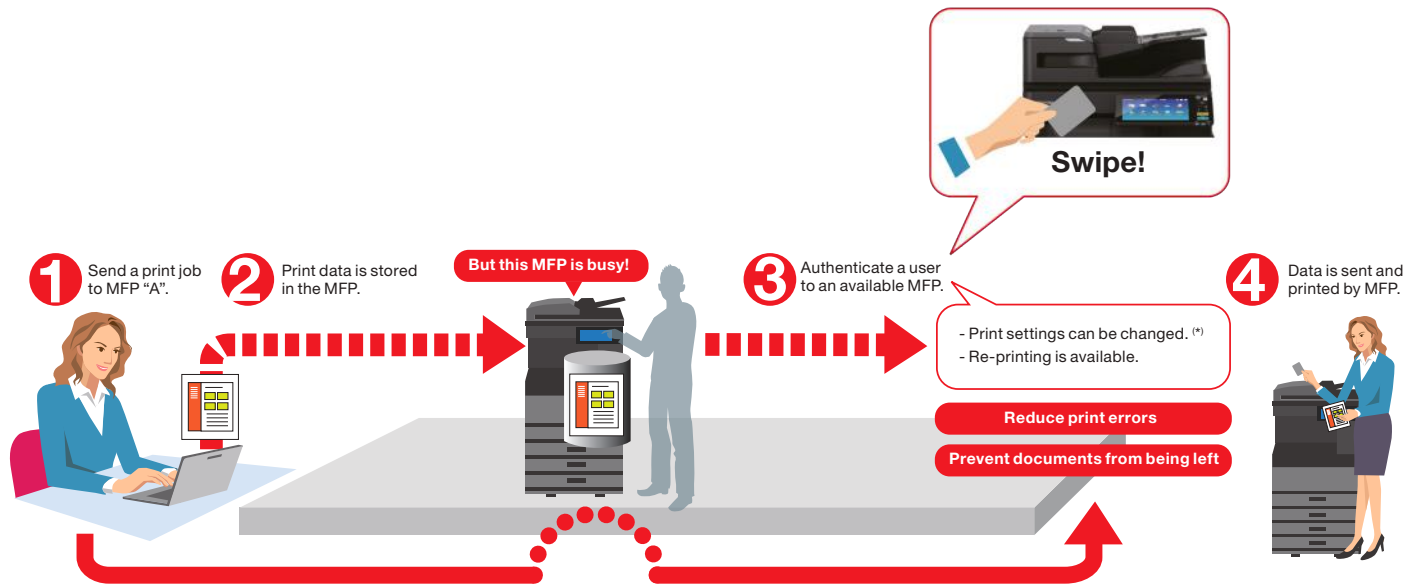

> Government

- Security is provided for confidential or sensitive documents.

> General office

- Multiple MFPs can be shared, improving productivity.
- Reductions in wasted paper.
- Installation cost is minimized by a server-less solution.

The Multi-Station Print feature facilitates the effective use of MFPs to improve operational efficiency.
